CMSgt Larry V. Holifield

A true visionary, Chief Holifield, in his role as the career field manager, created the model for the Air Force's expeditionary-minded communications squadron. He rallied the force to operationalize and professionalize the network, a concept central to today's cyber workforce.

CMSgt Richard P. "Hank" Sauer

Chief Sauer became a cryptologic operator and served in support of the Berlin Airlift during WWII. In the 70s, he rose through the ranks in industry, eventually becoming the chief of computing and telecommunications in the Department of Energy.

CMSgt Laurence Patrick

Chief Patrick served in the communications field for 47 years—he was a Morse intercept operator in his early years, and later as an AUTODIN switch center superintendent, he held the world record for overseas switch operational efficiency at 100% uptime for 66 consecutive days.

*How will you leave your mark on the cyber operations domain?*
