

Women

*Sophie
Wilson*

- 1987 Co-designed Acorn's first general-purpose home computer based on their own ARM architecture, the Archimedes
- 2011 Ranked among the "15 Most Important Women in Tech History"

She designed the Acorn System 1, an early 8-bit microcomputer for hobbyists, which was produced commercially by the British company Acorn Computers beginning in 1979.

Wilson's greatest legacy is her work on the original ARM processor. In 2011, ARM processors powered 95% of all smartphones, 10% of portable computers and 40% of digital TVs and set-top boxes, as well as many printers and other devices.

*What paths will you trailblaze that
no one has traveled before?*
